ITCS216: Fundamentals of Database Systems (1/2026)

Faculty of Information and Communication Technology

In-class Exercise 04: **Developing ERD/EERD**

SECTION 1

Objectives:

- Understand the business rules given the selected processes for University Database
- Develop the ERD/EERD from given business rules.

Instructions:

1. Use the given business rules to develop the ERD/EERD for University Database
2. Sketch the ERD/EERD using Chen Notations and submit by the end of the class.

Draw EERD for a university database *(noted that all attributes for each entity should be defined based on common understanding for university database)*:

R1: Every professor teaches exactly one subject (no more, no less), and every subject must be taught by some professor and 2 professors at most.

R2: All students must enroll for at least 3 subjects and at most 6 subjects.

R3: The enrollment made by each student can indicate the semester, academic year, and enrolled date.

R4: Students can register for the withdraw which is depend on the enrollment.

R5: A subject can be prerequisite for other subjects.

R6: A student can be classified by level of study which covers 3 types: PhD student1, Master student, and Bachelor student.

ERD/EERD
