**Question 1**

Complete

Mark 0.00 out of 1.00

Which category below can support the highest data rate and longest distance?

Answer: Cat7

Cat4 Cat5e Cat3 Cat6

The correct answer is:
Which category below can support the highest data rate and longest distance?

Answer: [Cat6]

**Question 2**

Complete

Mark 1.00 out of 1.00

A UTP cable consists of 4 wires.

- True
- False

The correct answer is 'False'.

**Question 3**

Complete

Mark 1.00 out of 1.00

Which cable type that has the overall braid and foil screen?

- a. S/FTP
- b. F/UTP
- c. SF/UTP
- d. U/UTP

The correct answer is: SF/UTP

**Question 4**

Complete

Mark 1.00 out of 1.00

Nobita wants to connect two routers together. Which cable type he has to use?

Answer: Crossover cable

Patch cable | None of these | Fiber cable

The correct answer is:
Nobita wants to connect two routers together. Which cable type he has to use?

Answer: [Crossover cable]

**Question 5**

Complete

Mark 0.00 out of 1.00

Based on Slide 30, what we can conclude?

a. Smaller gauge, smaller attenuation

b. Larger diameter, higher attenuation

c. Smaller gauge, higher frequency

d. Same gauge, same attenuation even different frequencies.

The correct answer is: Smaller gauge, smaller attenuation

**Question 6**

Complete

Mark 1.00 out of 1.00

Which one is the connector standard of UTP cable?

Answer: RJ-45

RJ-11 | RG-11 | CAT-11 | RG-45 | CAT-45

The correct answer is:
Which one is the connector standard of UTP cable?

Answer: [RJ-45]

**Question 7**

Complete

Mark 1.00 out of 1.00

The more twists, the worse quality of UTP cable.

- True
- False

The correct answer is 'False'.

**Question 8**

Complete

Mark 1.00 out of 1.00

Which trade-off is most characteristic of using Shielded Twisted-Pair (STP) cables rather than Unshielded Twisted-Pair (UTP) cables in high-noise environments such as factories?

a. STP provides higher data transmission bandwidth, but requires specialized IBM-only networking hardware.

b. STP eliminates the need for wire twisting, but incurs significantly higher manufacturing costs.

c. STP offers superior noise and crosstalk protection, but is bulkier and less flexible.

d. STP prevents signal loss at longer distances, but degrades easily when subjected to physical bending.

The correct answer is: STP offers superior noise and crosstalk protection, but is bulkier and less flexible.

**Question 9**

Complete

Mark 1.00 out of 1.00

Which cabling standard is mostly used in Thailand?

Answer: TIA/EIA 568B

TIA/EIA 568A | ISO27001:2022 | ISO/IEC 42001:2023

The correct answer is:
Which cabling standard is mostly used in Thailand?

Answer: [TIA/EIA 568B]

**Question 10**

Complete

Mark 1.00 out of 1.00

Why are copper wires in ethernet cables twisted around each other in pairs?

a. To make the cable more flexible and durable

b. To reduce electromagnetic interference (EMI) and crosstalk

c. To prevent wires from tangling inside the jacket

d. To increase the electrical voltage capacity of the cable

The correct answer is: To reduce electromagnetic interference (EMI) and crosstalk
