Duration	4 mins 33 secs
Grade	**5.00** out of 6.00 (**83.33**%)

Question 1

Complete

Mark 1.00 out of 1.00

Which one is the standard of coaxial cable?

Answer: RG

CAT OC RJ

The correct answer is:
Which one is the standard of coaxial cable?

Answer: [RG]

Question 2

Complete

Mark 0.00 out of 1.00

Between fiber optic and coaxial cable, which one has the higher attenuation per km?

Answer: Coaxial

Fiber Optic

The correct answer is:
Between fiber optic and coaxial cable, which one has the higher attenuation per km?

Answer: [Fiber Optic]

Question 3

Complete

Mark 1.00 out of 1.00

Which fiber optic types has the smaller diameter?

a. Single mode, step index
b. Multimode, step index
c. Multimode, graded index
d. Single mode

The correct answer is: Single mode

Question 4

Complete

Mark 1.00 out of 1.00

Which fiber optic types has the highest density at the center of the core and gradually decreases to its lowest at the edge?

a. Multimode, step index
b. Multimode, graded index
c. Single mode, step index
d. Single mode

The correct answer is: Multimode, graded index

Question 5

Complete

Mark 1.00 out of 1.00

Which one is not a connector type for coaxial cable?

Answer: RJ

N | UHF | SMA | BNC

The correct answer is:
Which one is not a connector type for coaxial cable?

Answer: [RJ]

Question 6

Complete

Mark 1.00 out of 1.00

Which situation makes the light internally reflect along a fiber optic cable?

- a. When the incident angle is less than or equal to the critical angle.
- b. When the incident angle is bigger than the critical angle.
- c. When the incident angle is less than the critical angle.
- d. When the incident angle is equal to the critical angle.

The correct answer is: When the incident angle is bigger than the critical angle.
