Status	Finished
Started	Thursday, 24 September 2026, 2:09 PM
Completed	Thursday, 24 September 2026, 2:22 PM
Duration	13 mins 14 secs
Grade	**22.00** out of 28.00 (**78.57**%)

Question 1

Complete

Mark 0.00 out of 2.00

Which wireless technology has the highest frequency range?

Answer: Infrared

The correct answer is:
Which wireless technology has the highest frequency range?

Answer: [Light wave]

Question 2

Complete

Mark 0.00 out of 1.00

Which Wi-Fi standard has the smallest communication range?

Answer: IEEE802.11a/ac

Hint: Slide No. 15

IEEE802.11b/g/n | IEEE802.11ah | IEEE802.11ad | IEEE802.11af

The correct answer is:
Which Wi-Fi standard has the smallest communication range?

Answer: [IEEE802.11ad]

Hint: Slide No. 15

Question 3

Complete

Mark 0.00 out of 1.00

Which Wi-Fi standard has the largest coverage area?

Answer: IEEE802.11b/g/n

Hint: Slide No. 15

IEEE802.11ah | IEEE802.11a/ac | IEEE802.11af | IEEE802.11ad

The correct answer is:
Which Wi-Fi standard has the largest coverage area?
Answer: [IEEE802.11af]

Hint: Slide No. 15

Question 4

Complete

Mark 2.00 out of 2.00

Which wireless technology that is considered as a lower power wireless WAN?

Answer: LoRA

Hint: Slide 11

The correct answer is:
Which wireless technology that is considered as a lower power wireless WAN?

Answer: [LoRA]

Hint: Slide 11

Question 5

Complete

Mark 2.00 out of 2.00

Which wireless technology that is considered as a WMAN technology?

Answer: WiMax

Hint: Slide 11

The correct answer is:
Which wireless technology that is considered as a WMAN technology?

Answer: [WiMax]

Hint: Slide 11

Question 6

Complete

Mark 0.00 out of 1.00

Select all free frequency bands that are unlicensed (free) and used by Wi-Fi.

Hint: Slide 17

- [x] a. 5 GHz (UNII)
- [ ] b. 3 GHz (VHF)
- [ ] c. 6 GHz (VHF)
- [ ] d. 2.4 GHz (ISM)
- [ ] e. 3 GHz (UHF)
- [ ] f. 3 GHz (WTF)
- [ ] g. 5 GHz (WHF)
- [x] h. 6 GHz (UHF)
- [ ] i. 5 GHz (ISM)
- [x] j. 2.4 GHz (UNII)
- [ ] k. 2.4 GHz (WHF)

The correct answers are: 5 GHz (UNII), 2.4 GHz (ISM)

Question 7

Complete

Mark 1.00 out of 1.00

Which **mode of operations** that a Wi-Fi device can connect to the Internet through an access point?

- ( ) a. Internet Mode
- ( ) b. P2P Mode
- ( ) c. Ad-hoc Mode
- (•) d. Infrastructure Mode

The correct answer is: Infrastructure Mode

Question 8

Complete

Mark 1.00 out of 1.00

What is a Stealth Access Point?
Hint: Slide 21

a. An access point designed to increase wireless network coverage

b. An access point that hides its presence by not broadcasting its SSID

c. An access point that automatically blocks unauthorized devices

d. An access point that encrypts all wireless traffic using WPA3

The correct answer is: An access point that hides its presence by not broadcasting its SSID

Question 9

Complete

Mark 4.00 out of 4.00

An IEEE802.11g access point operates at the [2.4 GHz] frequency band, while it can have channel numbers such as [1, 6, 11].

However, an IEEE802.11ac access point operates at [5 GHz] frequency band, while it can have channel numbers such as [42, 58, 106].

Hint: Slide 13, 22, 23, 25

The correct answer is:
An IEEE802.11g access point operates at the [2.4 GHz] frequency band, while it can have channel numbers such as [1, 6, 11].

However, an IEEE802.11ac access point operates at [5 GHz] frequency band, while it can have channel numbers such as [42, 58, 106].

Hint: Slide 13, 22, 23, 25

Question 10

Complete

Mark 1.00 out of 1.00

What is MIMO in IEEE 802.11ax (Wi-Fi 6)?

a. A technique that allows multiple antennas to transmit and receive multiple data streams simultaneously

b. A channel management technique that automatically changes the wireless operating frequency whenever interference is detected from neighboring access points

c. A technique that increases Wi-Fi security by encrypting data multiple times

d. A power management technique that reduces the transmission power of wireless devices during periods of low network activity

The correct answer is: A technique that allows multiple antennas to transmit and receive multiple data streams simultaneously

Question 11

Complete

Mark 3.00 out of 3.00

Select the antenna type for the following application.

- IrDA : unidirectional antenna
- Wi-Fi: omnidirectional antenna
- Microwave links: unidirectional antenna

Hint: 10, 37, 38, 39

The correct answer is:
Select the antenna type for the following application.

- IrDA : [unidirectional antenna]
- Wi-Fi: [omnidirectional antenna]
- Microwave links: [unidirectional antenna]

Hint: 10, 37, 38, 39

Question 12

Complete

Mark 8.00 out of 9.00

Select appropriate words for each wireless application.

- Satellite communication is considered as Microwave and propagates in sky propagation mode.
- TV remote control is considered as Infrared and propagates in line-of-sight propagation mode.
- Ham radio propagates the signal in sky propagation mode.
- FM radio propagates the signal in line-of-sight propagation mode.
- 4G and 5G are considered as Both Radio and Microwave and propagates in line-of-sight propagation mode.
- AM radio propagates the signal in ground propagation mode.

Hint: Slide 40

The correct answer is:
Select appropriate words for each wireless application.

- Satellite communication is considered as [Microwave] and propagates in [line-of-sight propagation] mode.
- TV remote control is considered as [Infrared] and propagates in [line-of-sight propagation] mode.
- Ham radio propagates the signal in [sky propagation] mode.
- FM radio propagates the signal in [line-of-sight propagation] mode.
- 4G and 5G are considered as [Both Radio and Microwave] and propagates in [line-of-sight propagation] mode.
- AM radio propagates the signal in [ground propagation] mode.

Hint: Slide 40
