2 & 3: Preferred Locations & Space Availability

Key findings on top campus study hubs and frequency of space shortages

Top Study Locations

72% at MU Library

MU Library **72%**

Faculty Spaces **64%**

Cafes (Informal) **36%**

Open Areas & MLC **20%**

Difficulty Finding Space

68% Weekly Shortage

Weekly Difficulty **68%**

40% weekly • 28% multiple times/wk

Rare Difficulty **28%**

Experience shortage once a month or less

No Difficulty **4%**

Never face space issues

4 & 5: Study Space Bottlenecks

Key findings on peak daily hours and academic term shortages

Peak Daily Difficulty

64% in Afternoon

Key Takeaways:

- **Afternoon Peak (1–4 PM):** Hardest time to find space, reported by 64% (16/25).
- **Midday & Evening:** 36% experience difficulty during 10 AM–1 PM and 4–7 PM.
- **Off-Peak Morning:** Before 10 AM sees almost no shortage (4%).

Peak Academic Period

84% during Finals

Key Takeaways:

- **Exams Drive Shortages:** Severe spikes occur during Finals (84%) and Midterms (76%).
- **Project Deadlines:** 20% experience shortages during major assignment weeks.
- **Regular Weeks:** Only 12% encounter issues during routine semester weeks.

6. What specific obstacles make finding or using a study spot difficult?

25 total responses • Multiple-choice selection (Select all that apply)

#1 Obstacle Tables or seats are physically full of students **64%** (16 responses)

Unoccupied seats are reserved by personal items left behind (bags, laptops, tumblers) **56%** (14)

Inadequate power outlets or charging points **48%** (12)

Weak or unstable campus Wi-Fi connection **48%** (12)

High ambient noise levels or loud group discussions **36%** (9)

Uncomfortable seating or inadequate lighting **32%** (8)

Operating hours are too short **16%** (4)

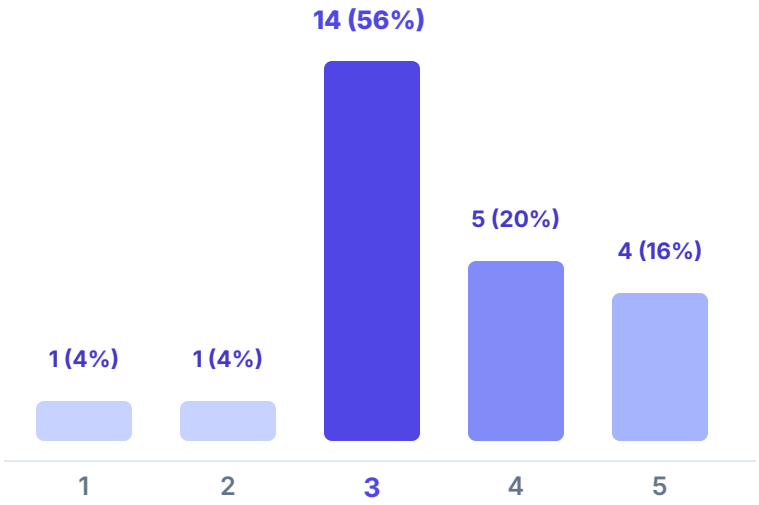

Other (Air conditioning problem) **4%** (1)

7 & 8: Study Space Satisfaction & Seat Saving Impact

25 total responses • 5-Point Rating Scale Survey Analysis

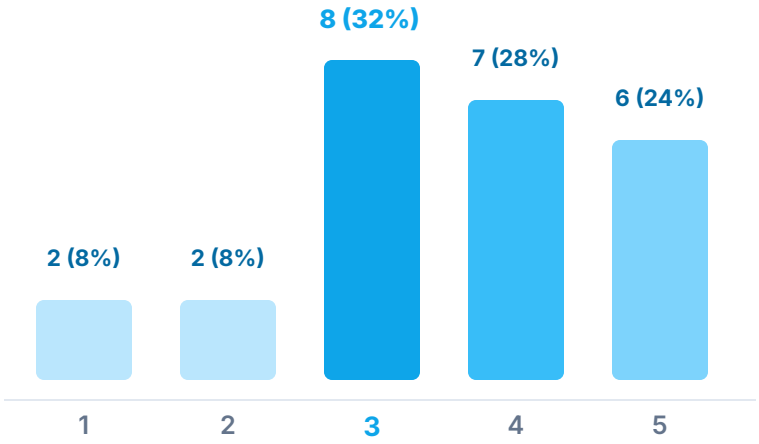

8. Adequacy of Campus Study Spaces

"Overall, how adequately do current campus study spaces meet your academic needs?"

7. Impact of Seat Saving Practice

"To what extent does saving seats with personal belongings affect your ability to find a study place?"

9. If campus management could implement only one immediate improvement, which should receive highest priority?

25 total responses • Single-option selection

#1 Top Priority Adding more total seating capacity / creating new study areas **40%**

Creating dedicated quiet zones separate from group discussion zones 20% (5)

Installing more electrical power outlets and charging stations 16% (4)

Extending operating hours (e.g., 24-hour access during exam periods) 12% (3)

Upgrading furniture comfort and desk space 8% (2)

Improve Wi-Fi / Other 4% (1)

Setting and enforcing a maximum absence time limit for reserved seats 0% (0)

Student Suggestions & Qualitative Feedback

Extended Hours

"Library should be open for all students until midnight"

Power Outlets

"in our faculty second floor is one of the best place to do coworking but the problem is there is not that much plug to charge my low power devices."

Peak Hours Capacity

"Make more space for the peak time"

Charging Placement

"Sometimes there are available seats, but there are no charging stations nearby making me decide not to sit there"

Climate & Noise

"It’s too hot and noisy"

Quiet & Individual Seating

"For quiet zones, it'd be great to have small, separate, personal seats"

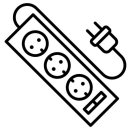

Call to Action & Recommendations

Key priority actions based on student feedback and survey analysis

1. General Campus

Provide extra seats and power strips during the examination period.

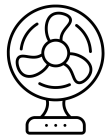

2. Faculty Spaces

Provide extra seats and fans in open areas during lunchtime.

3. ICT Department

Design a quiet zone for individuals who prefer studying at their own pace.
