1 introduction

Our consultancy : ICT student

Our purpose : investigate users’ habits, detect problems

Investigated problem : the learning space on the Mahidol University campus

2 problem

Problem : Lack of available learning spaces

Affected people : Students

Investigation purpose : Gain a better understanding of learning space problem

3 invesigation

Who did we ask : ICT students

Collect information through : Survey, Google form

25 respondents

What We Found

BUSY TIMES

Respondents: Many students said 1–4 PM and exam periods are difficult.

Pattern: Study space problems are more common during busy periods.

Evidence:

- Most students had problems during finals
- Nearly 65% had problems from 1–4 PM.

NOT ENOUGH SEATS

Respondents: Many students said it is hard to find an empty seat.

Pattern: Seat availability is a common problem.

Evidence:

- Nearly 65% said seats were full.
- More than half had problems with saved seats.

SPACE PROBLEMS

Respondents: Many students reported Wi-Fi and plug problems.

Pattern: A free seat is not always suitable for studying.

Evidence:

- Nearly half reported Wi-Fi problems.
- Nearly half had trouble finding plugs.

5 : Interpretation

What It Means

BUSY TIMES

- **Suggest:** Problems increase during busy times.
- **Matters:** Management can see when demand is highest.

NOT ENOUGH SEATS

- **Suggest:** Full and saved seats reduce availability.
- **Matters:** Management can see the impact on students.

SPACE PROBLEMS

- **Suggest:** Space quality also affects studying.
- **Matters:** Management can see other study space issues.

Conclusion

The investigation shows that :

Students face study space problems mainly during peak times and exam periods.

- BUSY TIMES MAKE FINDING A SEAT HARDER.
- SOME SEATS ARE NOT ACTUALLY AVAILABLE.
- SPACE QUALITY ALSO AFFECTS STUDENTS’ ABILITY TO STUDY.
