Dear CEO,

I am writing to an update about our team's progress. This week, we held a online group meeting to establish our problem scope, investigate direction, and questionnaire structure. Following discussion, we decided to focus the investigation on ICT student, then we structured our questionnaire into 4 key sections:

1. Location and Student habit
2. Frequency and Timing of issues
3. The difficulties
4. Overall Evaluation & Suggestions.

The interview session was processed this Friday and received 25 responses in total.

Here's is our team's project files:

1. Team Meeting Recording (mp4) - https://drive.google.com/file/d/1a36jj7qNdtOEGFgRTiviws5lTP0rDgF_/view?usp=sharing
2. Meeting Minutes (pdf) - https://drive.google.com/file/d/1pvSzhVHIUGu_bCIZbD3W8IuXkqDhaJB-/view?usp=sharing
3. Final Questionnaire (pdf) - https://drive.google.com/file/d/17v0DlOjiUBEdEXx7Zzl5WcWRcb_Q1gHj/view?usp=sharing
4. 20 Questionnaire Responses (csv) - https://docs.google.com/spreadsheets/d/1_El2Lp-lv6qOO9rpgD2Mg5Ng-7jX18QM4XnMb24MrQY/edit?usp=sharing

Furthermore, during our interview session, we've discovered that in faculty, the lunch time is the most difficult time to find a study space, and in general, the examination period is the most difficult time to have a seat in the library. Follow by the student's feedback about current study space, some students' complaint about the limited seat during peak hours, and some students want to have a cooler and quieter place for study.

Next, we would like to share our findings with the client, then provide relevant case studies, in case they would like to improve the current situation and ensure the sustainability simultaneously.

Sincerely,
Brighty Consultancy
